PRESSURE  
WASHERS

SELECTION GUIDE 2011-12

SELECTING A PRESSURE WASHER

CONSIDER WHAT YOU'RE CLEANING

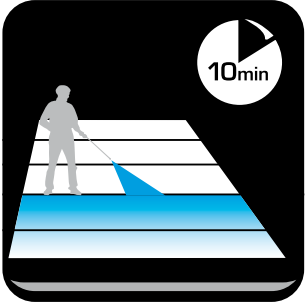

Assess what you will be using your pressure washer for. By doing this you will be able to determine what pressure (PSI), flow rate and accessories you need like detergent injection or project specific tips.

WATER PRESSURE

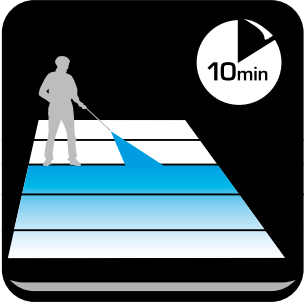

Water Pressure is the most important thing to consider and typically will be rated in PSI (pounds per square inch). The PSI of a pressure washer will determine how fast you will be able to clean an area as well as what projects the pressure washer is suited to. Domestic pressure washers can be categorised into light, medium and heavy duty project pressure washers. Light duty pressure washers are ideal for general use like cleaning boats & cars. Medium duty pressure washers are ideal for cleaning grease & grime from concrete path ways and decks. Heavy duty pressure washers give you more power for cleaning stubborn stains and large areas.

FLOW RATE

The flow rate of a pressure washer is typically measured in LPM (Litres per minute) and will also help categorise the pressure washer as light, medium or heavy duty unit. The higher flow rate, the easier and faster you will be able to clean particularly if you are cleaning out mud & sludge from an area.

**LIGHT DUTY**  
SIZE: Small projects  
CLEANING TIME: 1-4m² in 10min  
HOW OFTEN: Occasional Cleaning

**MEDIUM DUTY**  
SIZE: Small to medium projects  
CLEANING TIME: 1-9m² in 10min  
HOW OFTEN: Occasional to Frequent Cleaning

**HEAVY DUTY**  
SIZE: Small to large projects  
CLEANING TIME: 9-19m² in 10min  
HOW OFTEN: Frequent to Daily Cleaning

FREQUENCY OF USE

Considering how often you will be using your pressure washer will help determine what durability features you will want. Briggs & Stratton pressure washers come with aluminium axial cam pumps for occasional use, brass head axial cam pumps for regular use and brass head triplex pumps for frequent heavy duty users.

EASE OF USE

Briggs & Stratton pressure washers are built to be easy to use. With trolley style frames, flat free all terrain wheels, long hose lengths and all are powered by reliable Briggs & Stratton engines removing the need for a power source and the hassle of power cords.

PRESSURE WASHERS

2200

FEATURES:

- 2200PSI of cleaning power
- Light weight axial cam pump with aluminium head
- Briggs & Stratton 550 Series™ engine
- Sturdy wheeled frame for portability
- All terrain wheels resist puncture
- Thermal relief purges overheated water protecting pump
- Detergent injection system increases cleaning power
- Ideal for light-medium duty projects
- 2 Year Warranty\*

**2**  
YEAR  
WARRANTY\*

2700

FEATURES:

- 2700PSI of cleaning power
- Light weight axial cam pump with aluminium head
- Briggs & Stratton 775 Series™ engine
- Sturdy wheeled frame for portability
- All terrain wheels resist puncture
- Thermal relief purges overheated water protecting pump
- Detergent injection system increases cleaning power
- Ideal for medium duty projects
- 2 Year Warranty\*

**2**  
YEAR  
WARRANTY\*

3000

FEATURES:

- 3000PSI of cleaning power
- Reliable axial cam pump with durable brass head
- Briggs & Stratton 900 Series™ OHV engine
- Sturdy wheeled frame for portability
- All terrain wheels resist puncture
- Thermal relief purges overheated water protecting pump
- Detergent injection system increases cleaning power
- Ideal for medium-heavy duty projects
- 2 Year Warranty\*

**2**  
YEAR  
WARRANTY\*

3200

FEATURES:

- 3200PSI of cleaning power
- Comercial quality triplex pump with durable brass head
- Briggs & Stratton Intek™ Pro 10 engine
- Powder coated welded frame for greater durability
- All terrain wheels resist puncture
- Thermal relief purges overheated water protecting pump
- Detergent injection system increases cleaning power
- Ideal for heavy duty projects
- 2 Year Warranty\*
