

Briggs & Stratton pumps offer a premium combination of power, performance and value you would only expect from a trusted brand like Briggs & Stratton.

For over 100 years we've been building the engines in power equipment that people use every day to get the job done right.

It's the reason Australians look for the Briggs & Stratton brand when shopping for power equipment.

And you'll be supported by the largest service network in the Australian Outdoor Power Equipment industry.

Important information about Pumps

LPM Discharge Capacity

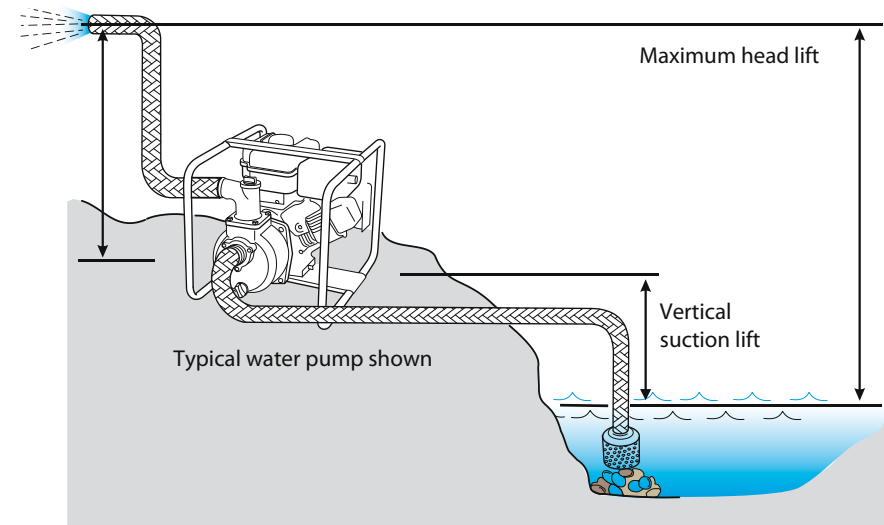

Is the rate of speed that water flows from the source to the discharge point, measured in litres per minute.

The higher the LPM performance, the more water a pump can move.

Maximum Head Lift

Is the distance of the vertical suction lift, plus the vertical distance of the pump to the output destination.

Please note: a pumps' discharge capacity decreases as the head lift height increases.

Uses of Briggs & Stratton Pumps

Draining water from a basement

Draining and filling your swimming pool, pond or hot tub

Draining shallow flooded areas

Irrigation purposes for agricultural or lawn sprinkling

Distributing fertilizers and pesticides

Various other tasks including construction purposes
