# BERENDS

## Landscape Rakes

One of the only Australian made landscape rakes on the market, this machine is ideal for raking light material, harrowing pastures and for final soil surface preparation—whether it be on the driveway, the garden or even the horse arena.

- Three different pitch settings controls the aggressiveness, including one float position which allows the tine to hinge backwards on the frame. This would be used when operating around rocks or stumps and enables the tines to lift over those obstacles. There is enough weight in the frame to keep the tines on the ground under normal raking conditions.
- Heavy tubular construction and heavy tines makes the imported ones look lightweight.
- 12 month warranty against faulty workmanship.
