

Wire Winder

Rolling up old fence wire? 2 hours to do 200m?

Save time, money and your physical wellbeing by using the Munro WireWinder.

Developed by fencing contractors and engineers the WireWinder has proved to be a must have for anyone involved in fencing.

- Eurohitch or Burder
- Fast and Powerful
- Low maintenance required
- Easy to use
- One man operation
- Reduces fatigue and injury
- Barbed, plain ringlock or a combination of wires

Contractors using this equipment have wound up a full 300acre dairy farm system (Predominately 2-3 plain wire fences) lane systems and paddocks in 25 hours. That's approximately 50 lineal kilometers, pulled off posts then wound up.

Machine is capable of up to 3 panels of ringlock at once, or a combination of barbed and plain in excess of 10 wires at a time, and speeds up to 20 kmh!

Winding up fence lines at a rate of up to 300m per minute makes it an invaluable machine for any contractor or person looking to tackle the big jobs.
