

# THE ULTIMATE UTILITY UPGRADE

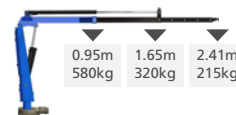

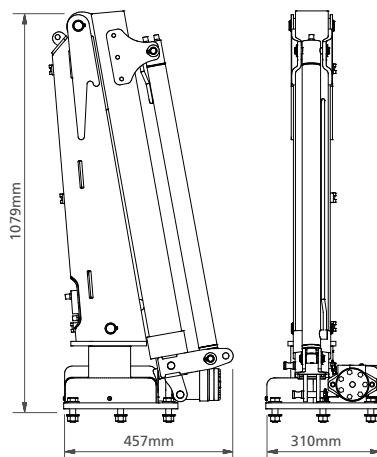

**“**Our Quicklift has been the best decision we have ever made. Such a compact and light weight crane for the big reach and lifting capacity! It's a great little unit and has worked well in some situations I feel no other unit could have coped with. We have considered adding to our fleet and when we do, we want another Quicklift crane. It gets a lot of attention when it's out working - even from the Big Truck Boys!!! We are impressed, and so are they. **”**

Roger Preston

## Quicklift 055

The backsaver! The cost effective fully hydraulic lifter to save you all that manual lifting - Plus the advantage of lifting up to 500kg! Ultra compact, light weight 055 crane is a perfect fit for utes and light trucks. Comes complete with base plate and manual stabiliser.

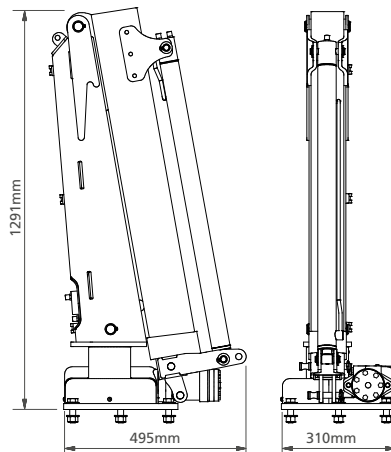

<b>WEIGHTS:</b>	
055 Crane	115kg
Base frame	35kg
Stabiliser jack	Included
Maximum lift	580kg

## Quicklift 080

The backsaver's bigger brother, up-sped to lift up to 700kg! The 080 is also an ultra compact, light weight crane that is a perfect fit for utes and light trucks. Comes complete with base plate and manual stabiliser.

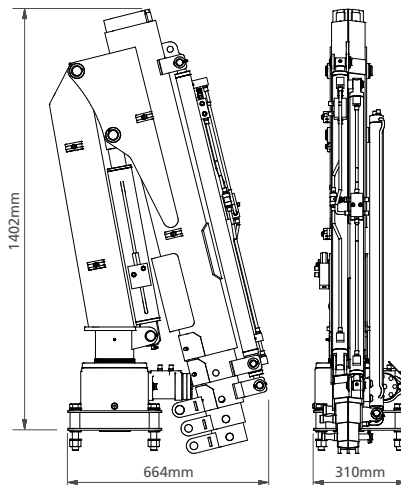

<b>WEIGHTS:</b>	
080 Crane	124kg
Base frame	35kg
Stabiliser jack	Included
Maximum lift	700kg

## Quicklift 150

The big lifter for Utes, the 150 is designed to get the maximum lift from a ute or trailer mounted unit. Compact foot print, and optional base frame, designed to be hidden under the deck, so deck utilisation is not lost.

<b>WEIGHTS:</b>	
150-2 Crane	158kg
150-3 Crane	180kg
Base frame	80kg
Stabiliser	20kg
Maximum lift	1460kg

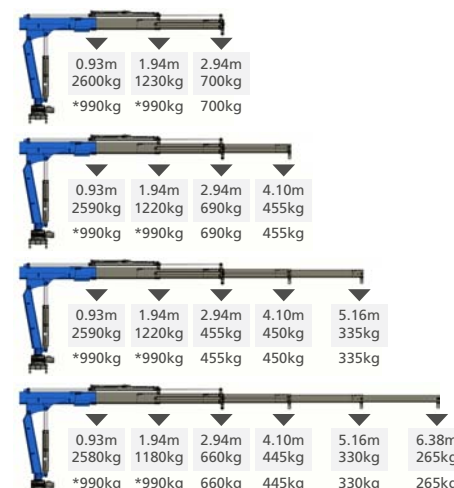

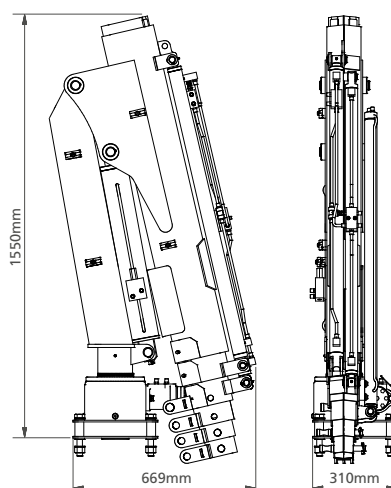

\* Maximum rating limit of crane without optional overload protection system fitted.

## Quicklift 250

Big punch for its class. The preferred choice for many ute, light truck and seed drill operators, also popular on small fishing and work boats. Compact foot print, and optional base frame that's designed to be hidden under the deck, so deck utilisation is not lost.

<b>WEIGHTS:</b>	
250-2 Crane	220kg
250-3 Crane	246kg
Base frame	80kg
Stabiliser	20kg
Maximum lift	2600kg

\* Maximum rating limit of crane without optional overload protection system fitted.

# PROVEN INDUSTRY COMPANION

## Designed and tested in New Zealand

Quicklift compact cranes are proudly designed and tested, in New Zealand with components sourced from around the globe to achieve this world-class product.

## Health and safety efficient

Quicklift compact cranes are also ideally suited to replace manual handling of heavy and dangerous goods. Designed to meet and exceed international standards such as AS1418. Ergonomically designed with precision controls to maximise performance.

## Load limiting safety device

Quicklift compact cranes offer the option of a Load Limiting Safety Device, in order to comply with Australian standard AS1418 and to cater for any company that wants to provide their staff with the best safety measures available. Quicklift uses a unique fully hydraulic\* system, providing less installation cost and reduced risk over breakdowns caused by electrical component faults, which can amount to a huge loss of production time. \*Power is needed to run the alarm.

## Powerfully compact

Quicklift compact cranes pair light tare weight with impressive power to weight ratio enabling fitment to light trucks, utes, agricultural equipment and sea craft. Very compact stow position, provides optimal space utilisation around the crane with a number of installation methods due to a modular base frame system.

## Maximum strength under load

Quicklift compact cranes use a hexagonal boom design which allows for maximum strength under load, when in the lifting position. The very high boom angle allows the operator to get even closer to your load and an adjustable slew stopping position can be set to suit every application.

## Low running costs, high productivity

Low power demand and low tare weight, giving you more fitting options, lower running costs and greater payload. Lifting up to nearly 700% more than dead weight, and ultra compact stow foot print, gives you the best of both worlds - big lifting capacity for a minimum sacrifice in space.

## Genuine parts and accessories

Quicklift have a range of accessories designed to maximise the benefit of your Quicklift crane such as; power packs, hydraulic or electric winches, wireless remote control operation, stabiliser legs, extra reach kits. Being a New Zealand product, we can customise to your requirements.

## 3 year warranty

Quicklift compact cranes have proven so reliable, we can offer a comprehensive 3 year warranty.

## After sales support network

Quicklift compact cranes are backed by a nationwide fitting and service network, with parts also stocked in New Zealand.

**“We run NZ’s biggest beekeeping operation, and use quicklift to save us a lot of heavy lifting, even the oldies can now shift hives again. Quicklift has proved to be exactly what we want in a crane for a small truck and trailer unit - Light, compact, trouble free and easy to use. We all love it!”** Russell Berry, Managing Director, Arataki Honey Ltd - Rotorua Division

**“Our new boat ‘Ata Whenua’ has been finished for a few months now, and the marine spec Quicklift you supplied for this has proven to be just what we wanted. Quicklift will be on the top of the list when setting up our next boat.”** Darren King-Turner
