CULTIVATION

Break down clods, weed control and final seedbed preparation

BROADACRE STUMP JUMP HARROW SERIES 44 - WRAP AROUND FRAME DESIGN

Experience the difference with Murray's Series 44 known as the "Broadacre Stump Jump Harrow". Featuring a 'Wrap Around' tine design, which effectively creates the section frame, the Series 44 is manufactured using High Carbon Steel 'Forged' tines. Our forging process shapes the tine into a diamond shape and will ensure that your tines are able to endure rough surfaces and clear your land with ease. The tines also feature greater layback which is designed for superior trash flow.

Equipped with 2 pulling points per section, this Stump Jump is compatible with most makes of Hydraulic Drawbars.
