Effective October 2016

Transfer Pumps

Kohler applies their industry leading technology to a 2" and 3" water transfer pump designed for pumping clean water wherever water removal is required. With flow rates from 601 lpm up to 1003 lpm, Kohler water pumps are suitable for a range of applications.

Each pump comes with a 360-degree roll cage and an Oil Sentry™ design to automatically shut the engine down in low-oil conditions for extra protection.

WP2.0

WP3.0
